

Open Session

21st of FEBRUARY 2018

## Greetings

Although the framework might change on the global stage—environmental technology and efficiency of resources remain among central issues from a local, a national or global perspective. Environmentally-compatible products and energy sources are—and will be—essential, as are techniques for conservation of raw materials and reduction of emissions. Consequently—and on a global scale—the market for green technologies will further establish itself as a vital part of the world economy. It is of the essence to bring innovative ideas quickly to fruition. With this event bwcon GmbH, a spin-off of Baden-Württemberg: Connected e.V., the leading high-tech cluster in Baden-Württemberg, and Umwelttechnik BW GmbH, the State Agency for Environmental Technologies and Resource Efficiency, established a platform and market place where innovative ideas in the fields of energy, green technology, and eco innovation can be discussed with relevant stakeholders from economy and finance—to finally stimulate further innovation and entrepreneurship. Already in its fourth edition we are looking forward to this year's GIIF and wish all participants a rewarding meeting, new inspiration and an overall sustainable success.

**Dr. Jürgen Jähnert**

Managing Director, bwcon GmbH

**Dr.-Ing. Hannes Spieth**
